
Conducting Cisco Unified Wireless Site Survey

Duración: 5 Días **Código del Curso: CUWSS**

Temario:

The goal of this 5 day course is to provide students with information and practice activities to prepare students to technically plan and conduct a wireless site survey. The student should be able to design the RF network and conduct a post installation assessment to ensure compliancy.

Dirigido a:

Channel Partner / Reseller , Customer, Employee

Objetivos:

- **Module 1** Prepare for the Site Survey
 - Upon completion of this module, the student should be able to describe the requirements necessary for preparing for a site survey.
 - **Module 2** Plan for the Site Survey
 - Upon completion of this module, the student should be able to describe the requirements necessary for planning a site survey.
 - **Module 3:** Conduct the Site Survey
 - Upon completion of this module, the student should be able to perform a site survey for data, voice and location applications.
 - **Module 4:** Design the RF Network
 - Upon completion of this module, the student should be able to determine the placement of the access points for data, voice and location applications.
 - **Module 5:** Assessing the Deployment
 - Upon completion of this module, the student should be able to assess the deployment of the WLAN.
-

Prerequisites:

- ICND1
- ICND2
- IUWNE

Exámenes y certificación

642-731 CUWSS

Contenido:

Prepare for the Site Survey

- Identifying Site Survey Requirements for Different Vertical Industries.
- Identifying Customer Requirements.
- Identifying various regulatory issues affecting a site survey.
- Identifying Safety and Aesthetic Requirements.
- Understanding Logistical Considerations.

Plan for the Site Survey

- Describe the requirements necessary for planning a site survey
- Determining the Proper Deployment Characteristics
- Specifying the Tools Necessary to Complete a Site Survey
- Defining Site Survey Documentation

Conduct the Site Survey

- Producing a Predictive Site Survey
- Conducting a Layer 1 Site Survey
- Conducting a Layer 2 Site Survey for Data
- Conducting a Layer 2 Site Survey for Voice Applications
- Conducting a Layer 2 Site Survey for Location

Design the RF Network

- Determining the Infrastructure Requirements for the WLAN
- Conducting a Layer 1 Site Survey
- Determining the WLAN Equipment and Licenses

Assessing the Deployment

- Verifying the RF Coverage
- Verifying WLAN Readiness
- Presenting an Installation Report
